

Apilus® Technology

Apilus® offers advanced technology with proven effectiveness in the field of hair removal. Already in use in thousands of Apilus® Centres throughout the world, our systems have demonstrated time and time again that Apilus® delivers more effective and more comfortable treatments as well as much more rapid permanent results than any other hair removal technique.

Thanks to its powerful circuits entirely controlled by computer, Apilus® offers professional electrologists pinpoint precision and perfect settings to guarantee the results you seek. You can finally say goodbye to unwanted hair, whether on the face or any other part of the body.

Apilus® is also equipped with a unique "tolerance test", which allows the unit to be adjusted and adapted to your level of sensitivity to the current. Apilus® high-precision circuitry uses application pulses as short as one-thousandth of a second, which assures incomparable comfort.

Apilus®

the gentle way
to permanent hair removal.
Don't settle for anything less.

Apilus® Centres

Some electrolysis systems are simply better than others. In the same fashion, Apilus® Centres stand out for their professionalism and their desire to offer their clients the best there is in permanent hair removal. In these electrolysis and aesthetics salons, the staff has received in-depth training on Apilus® technology. You can therefore undergo treatments in full confidence, knowing you are in the hands of a certified technician using ultramodern technology and equipment as well as sterilized disposable probes.

An Apilus® electrologist is someone who believes quality and security are key elements of her practice and who puts your well-being and satisfaction first. Don't hesitate to ask for detailed explanations during your first consultation and throughout your treatment.
